

Infosys 2026 DSE Role — DSA Preparation Plan (Python)

This preparation guide is designed specifically for Infosys 2026 Digital Specialist Engineer (DSE) hiring. The focus is mainly on DSA, coding rounds, graphs, dynamic programming, and technical MCQs.

Expected Coding Difficulty for DSE

- Easy to Medium level problems
- Usually 2–3 coding questions
- Need at least 1 fully solved question for strong shortlist chances

Tier 1 — Most Important DSA Topics

- Arrays
- Strings
- HashMaps / Dictionaries
- Sliding Window
- Binary Search

Arrays Practice Problems

- Two Sum
- Maximum Subarray
- Move Zeroes
- Product Except Self
- Best Time to Buy Stock

Strings Practice Problems

- Valid Anagram
- Longest Substring Without Repeating Characters
- Valid Palindrome
- Group Anagrams

Tier 2 — Important Topics

- Recursion + Backtracking
- Stack + Queue
- Linked List

Tier 3 — Important for 2026

- Graphs (BFS, DFS, Adjacency List)

- Dynamic Programming Basics
- Memoization and Tabulation

Graphs Practice Problems

- Number of Islands
- Flood Fill
- Clone Graph

Dynamic Programming Problems

- Climbing Stairs
- House Robber
- Coin Change
- Longest Increasing Subsequence

Technical MCQs Preparation

- OOPs
- DBMS
- SQL
- Operating Systems
- Computer Networks

Best Platforms

- LeetCode Easy + Medium
- HackerRank Problem Solving
- GeeksforGeeks for CS theory

Daily Timetable (10 Days)

- Morning: DSA concepts
- Afternoon: Solve 5 coding problems
- Evening: Timed coding practice
- Night: CS subjects revision

Important Exam Strategy

- Read all coding questions first
- Solve easiest question completely
- Passing test cases matters most
- Then attempt second problem

Target for DSE Role

- Technical MCQs should be decent
- 1 coding question fully solved
- Second question partial/full attempt

Recommended LeetCode Problems

- Two Sum
- Maximum Subarray
- Valid Anagram
- Binary Search
- Number of Islands
- Climbing Stairs

Final Advice:

Focus mainly on Easy and Medium DSA problems, coding speed, and passing all test cases. Do not spend too much time on advanced competitive programming topics.
